DATASHEET

METADEFENDER™

Managed File Transfer

Security-First File Transfer with AI-Based Threat Prevention, Policy Enforcement, and Audit-Ready Visibility

MetaDefender Managed File Transfer delivers governed, secure file transfer across users, partners, systems, and segmented environments. It combines AI-based file security, automated transfer workflows, intelligent routing, admin visibility, and audit-ready reporting to help organizations maintain compliance and operational continuity across IT, OT, and segmented environments.

Key Features

AI-Powered Threat Prevention
Detect known, unknown, and evasive threats with multiple anti-malware engines, Deep CDR™ Technology, Predictive Alin AI, and MetaDefender Aether™.

Continuous Zero-day Prevention
Rescan files periodically with multiscanning and sandbox-based analysis as new threat intelligence emerges.

Connector and Tool Integrations
Integrate via APIs, file sharing protocols, enterprise connectors, MetaDefender™ ICAP Server, and secure storage-enabled security workflows.

Cross-Domain and IT/OT Transfer
Move files across segmented, air-gapped, and OT environments with MetaDefender™ NetWall™ and MetaDefender™ Kiosk integration and governed transfer controls.

Visual Orchestration and Routing
Automate governed file movement across segmented environments with visual workflows, secure forms, metadata-driven routing, and policy-enforced MFT-to-MFT transfer paths.

Secure Collaboration and File Sharing
Enable governed direct uploads from external and internal users, and shared-folder collaboration workflows.

Admin / CISO Visibility
Monitor file security, system health, transfer activity, and multi-stage approval workflows from centralized dashboards.

Audit-Ready Compliance Reporting
Generate audit-ready reports across transfers, scan results, policy decisions, and file activity with Security Report Builder and audit logs.

METADEFENDER

Managed File Transfer

AI-Powered Threat Prevention

Secure every transfer with end-to-end encryption, strong authentication, and OPSWAT's AI-driven technology stack.

Intelligent File Routing

Automate governed file movement across users, systems, and partners with visual orchestration, metadata-driven routing, enterprise connectors, and SharePoint-based collaboration.

Visibility and Resilient Operations

Monitor file security, transfers, and system health through centralized dashboards with high-availability deployment.

Data Security Compliance

Support compliance with next-generation reporting, extended audit logs, SIEM integration, and chain-of-custody visibility.
