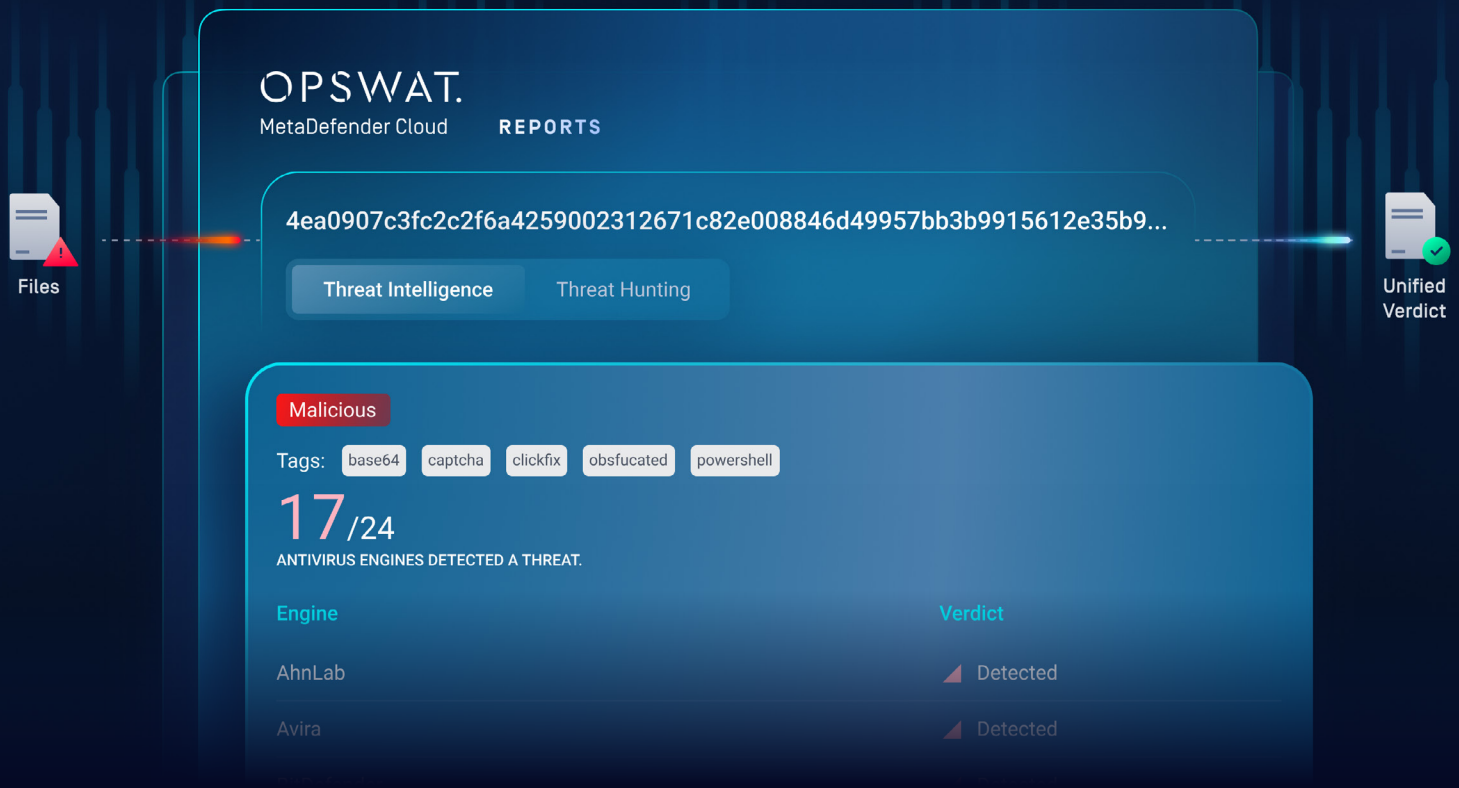
OPSWAT.

SOLUTION BRIEF



METADEFENDER™

Threat Intelligence

Stop Attacks & Hunt Threats

MetaDefender Threat Intelligence delivers real-time threat reputation and automated threat hunting to help teams detect and stop emerging threats earlier. Global sandbox telemetry updates threat indicator lists, enriching every lookup with deeper context, faster detection, and clearer threat correlations.

Checks URLs, IPs, & domains in real time or offline to detect malware & phishing

Flags suspicious or unknown files for deeper analysis

Continuously updated with new indicators discovered by Dynamic Analysis

Weighs persistence, injection, & C2 activity to produce an actionable verdict

Machine-readable results & IOCs for automated response & policy enforcement

METADEFENDER THREAT INTELLIGENCE

Deep Threat Visibility for Rapid Response

Harness billions of threat indicators & machine-learning pattern matching to identify larger attack campaigns and attacker infrastructure.

Threat Reputation Service

- Access to 50+ billion hashes, IPs, URLs, and domains
- Supports bulk and individual searches via a REST API
- Scans IP addresses, URLs, and domains using up to 30 providers
- Correlates hashes to millions of known applications and CVEs
- Continuously updated with new IOCs and threat intelligence

Threat Hunting Pattern Correlation

- Aggregates verdicts, reports, and IOCs for proactive investigation
- Threat hunting identifies similarities between new and known malware
- Enables correlation across samples to identify related campaigns or threat families
- Integrates with SIEM, SOAR, and Central Management for unified visibility and faster response

Empower Threat Hunting with Data-Driven Threat Intelligence

Improved Threat Detection and Response	▪ Enhances visibility with comprehensive intelligence ▪ Reduces response times with actionable data ▪ Facilitates proactive defense with real-time alerts
Streamlined Security Operations	▪ Increases efficiency by automating detection and analysis ▪ Provides contextual information to prioritize responses ▪ Promotes collaboration and sharing across teams and industry partners
Automated Threat Hunting	▪ Identifies related threat samples, shared attacker infrastructure, and the patterns behind evolving attacks
Threat Similarity Enrichment	▪ Finds related indicators, behavioral artifacts, & similarity signals, adding context to speed investigations and strengthen SIEM & SOAR
Threat Intelligence in the Cloud	▪ Delivers continuously updated intelligence without infrastructure upkeep. High-volume lookups scale instantly through the API, ensuring enriched results are always current and ready for automated workflows.

OPSWAT.
Protecting the World's Critical Infrastructure

For over 20 years OPSWAT, a global leader in IT, OT, and ICS critical infrastructure cybersecurity, has continuously evolved an end-to-end solutions platform that gives public and private sector organizations and enterprises spanning Financial Services, Defense, Manufacturing, Energy, Aerospace, and Transportation Systems the critical advantage needed to protect their complex networks from cyberthreats.

Built on a "Trust no file. Trust no device.™" philosophy, OPSWAT solves customers' challenges like hardware scanning to secure the transfer of data, files, and device access with zero-trust solutions and patented technologies across every level of their infrastructure. OPSWAT is trusted globally by more than 1,900 organizations, governments, and institutions across critical infrastructure to help secure their devices, files, and networks from known and unknown threats, zero-day attacks, and malware, while ensuring compliance with industry and government-driven policies and regulations.

Discover how OPSWAT is protecting the world's critical infrastructure and securing our way of life; visit www.opswat.com.
