

MetaDefender® Kiosk

K3001 Premium – Trust at the point of entry

Can you trust every file that enters or exits your facility?

Any time portable media accesses secure environments, critical infrastructure risks exposure. Software updates, reporting and audits all require external data sources.

MetaDefender Kiosk acts as a digital security guard—inspecting all media for malware, vulnerabilities, and sensitive data.

Insert. Process. Access.

MetaDefender Kiosk accepts multiple form factors, including CD/DVD, 3.5" diskettes, flash memory cards, mobile devices, and USBs—even when encrypted.

Once inserted, MetaDefender Kiosk immediately scans for malware, vulnerabilities, and sensitive data. Suspicious files can be sanitized. Sensitive files can be redacted.

MetaDefender Kiosk lets you trust all portable media that enters or exits your facility.

MetaDefender Kiosk

Features

✓ **Built to Protect Critical Infrastructure.**

Advanced cybersecurity threat protection with OPSWAT Deep CDR, File-based Vulnerability Assessment, Threat Intelligence, and Proactive Data Loss Prevention, and 20 anti-malware engines. The K3001 supports most common portable media types, including floppy drives, with a variety of built-in media readers on the front of the kiosk.

✓ **Ready to Deploy.**

Each kiosk is pre-configured for your deployment with a region-specific power cord, power protection, and an uninterruptible power supply. The K3001 Premium comes standard with a pre-hardened operating system, pre-installed OPSWAT software, Ethernet, Wi-Fi, and mounting accessories.

✓ **Designed with Physical Security.**

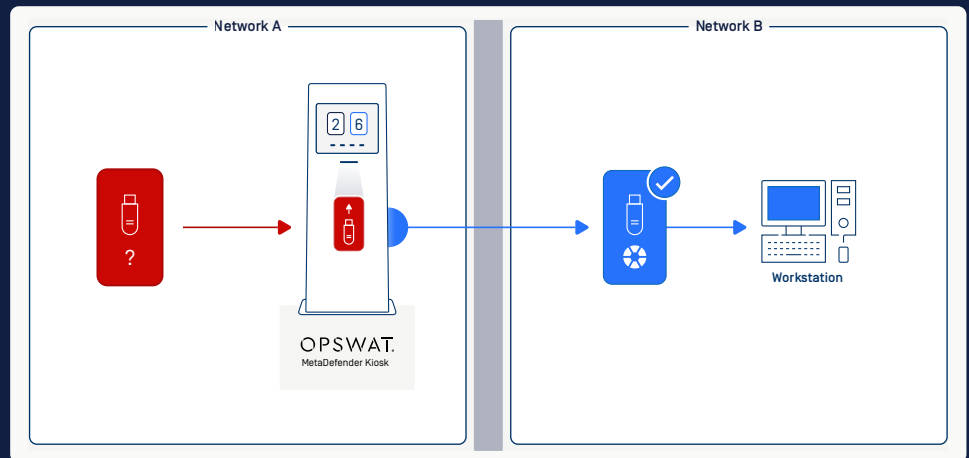

Dual heavy-duty locks secure the main cabinet, and a separate heavy-duty lock secures a fully enclosed printer cabinet. Kiosks are keyed uniquely and specifically for your deployment. Internal floor mounting anchors ensure tamper-resistant permanent placement.

✓ **Ruggedized for Industrial Environments.**

Heavy-duty powder-coated steel enclosure with stainless steel and aluminum internal cabinetry is built to last. Active ventilation, low-profile antennae, and exterior sealed port for power and Ethernet make the K3001 Premium suitable for deployments in industrial and office locations.

Critical infrastructure needs to move data and devices across isolated network domains safely.

OPSWAT helps govern and secure data or device transfer for segmented and air-gapped network environments.

MetaDefender Kiosk

Capabilities

Proactive Data Loss Prevention (Proactive DLP)

Detects or blocks sensitive data/personally identifiable information (PII) from leaking by redacting it from 30+ common file types; PCI/DSS & GDPR compliant

Deep Content Disarm & Reconstruction (Deep CDR)

Removes suspect and superfluous data from common file types, such as .doc and .pdf

Multiscanning

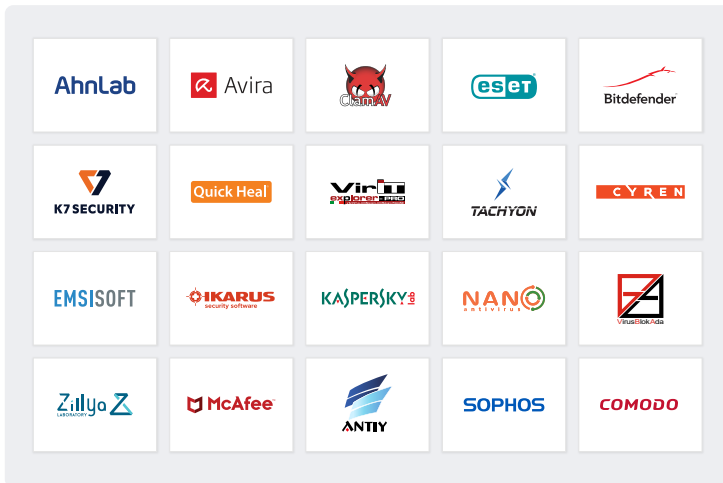

Proactively detects 99%+ of malware threats; integrates 20 malware engines by using signatures, heuristics and machine learning

File-based Vulnerability Assessment

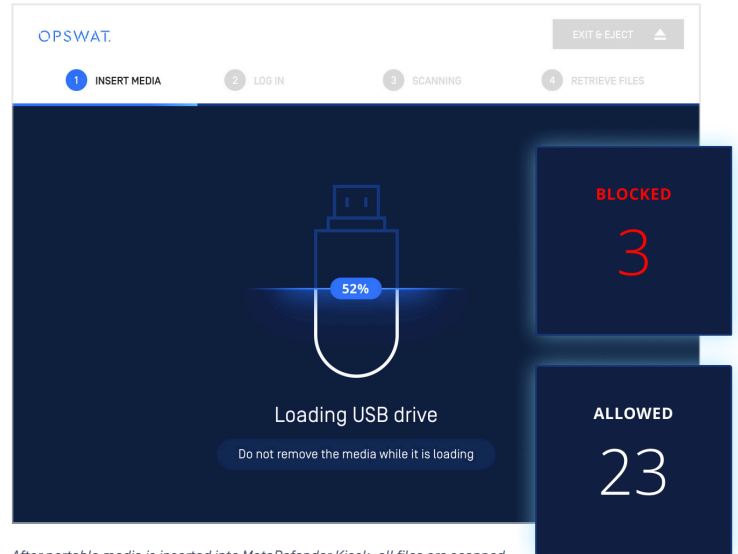

Detect known exploits in 20,000+ software applications before they are installed

Threat Intelligence & Sandbox Data

New threats are updated in real-time; in-the-wild reputation analysis is conducted on every suspicious file

Up to 20 individual malware engines can be integrated into MetaDefender Kiosk.

After portable media is inserted into MetaDefender Kiosk, all files are scanned for malware and vulnerabilities. Malicious files are blocked. Suspect files can be cleaned. Only clean, safe portable media enter your environment.

Additional Features

Support **multiple file systems**: FAT, NTFS, Ext, HFS+ & APFS

Mount and scan **virtual disks**: VHD and VMDK

Media Validation Agent blocks unscanned media from accessing your environment

Wipe portable media completely clean with **secure erase** option, before loading approved content

Hardened OS incorporates File Integrity Monitoring and Application Whitelisting

Integrates seamlessly with **MetaDefender Vault** for file storage and retrieval
