4.1 Alerts by Device

Three (3) different devices triggered 90 alerts in April 2024. The detailed alert information is as follows:

Total Alerts Fired by Devices

Most Alerts Fired Devices

| Device Name | Count |
|-------------|-------|
| Device #1   | 30    |
| Device #2   | 30    |
| Device #3   | 30    |

## 4.2 Alert Details

The triggered alert details and descriptions are as follows:

| Device Name | Alert Description | Count |
|-------------|-------------------|-------|
| Device #1   | Alert Name        | 30    |
| Device #2   | Alert Name        | 30    |
| Device #3   | Alert Name        | 30    |

## 4.3 Action for Triggered Alerts

Find the actions that were taken by OPSWAT Security Analysts after alerts were triggered.

## 5 - Conclusion[s] and Recommendation[s]

---

### 5.1 Conclusion

The OPSWAT Managed Services team is monitoring six [6] devices in the organization. All devices monitored by the OPSWAT Managed Services Team are in good health.

### 5.2 Recommendation[s]

OPSWAT recommends that:

- Recommendations about device security
- Recommendations about security enhancements
- Recommendations about the alerts

OPSWAT is a global leader in IT, OT, and ICS critical infrastructure cybersecurity, and for the last 20 years has continuously evolved an end-to-end solutions platform that empowers public and private sector organizations with the critical advantage needed to protect their complex networks and ensure compliance. OPSWAT solves customers' cybersecurity challenges around the world with zero-trust solutions and patented technologies across every level of their infrastructure, securing their networks, data, and devices, and preventing known and unknown threats, zero-day attacks, and malware.
