OPSWAT.

My OPSWAT™ Central Management

Streamlined Management, Security and Secure Access

My OPSWAT Central Management is a single-pane-of-glass platform to manage all OPSWAT MetaDefender products, collect real-time data, and generate comprehensive reports. It also enables administrators to perform operations globally, manage licenses, and simplify product updates. My OPSWAT Central Management streamlines your operations while enhancing network visibility and control to safeguard your critical infrastructure.

Business and Technical Challenges

Complex Security Management
Managing security across multiple locations, devices, and solutions can become overly complex, leading to inconsistency, inefficiencies, and increased risk of human error.

Inefficient Monitoring
Security teams struggle to collect, aggregate and analyze data from multiple consoles, increasing the risk of blind spots in threat detection, especially in large and complex environments.

High Cost Management
Managing disparate security solutions consumes valuable time and resources. Also, addressing security incidents across multiple platforms can lead to inflated operational costs and impact overall profitability.

Features & Benefits

Single Pane of Glass
Manage all MetaDefender product instances easily from a single console. Update security policies, manage anti-malware updates, health monitoring, which helps save time and reduce complexity so organizations can focus more on business priorities and less on security maintenance.

Global Risk Data Visibility and Management
By aggregating events and reports across all products, it quickly identifies security risks and alerts administrators. Real-time analytics support faster threat detection, timely patching, and proactive data leak prevention.

Endpoint and Secure Access Control
Push critical updates across all OPSWAT Metadefender products in both online and offline modes to stay ahead of evolving threats, with no manual intervention required.

Streamlined Product Updates
Push critical updates across all OPSWAT Metadefender products in both online and offline modes to stay ahead of evolving threats, with no manual intervention required.

Detailed Reports and Analytical Tools
Collect real-time data from all connected OPSWAT MetaDefender products, generate in-depth device usage and access reports, and leverage analytics to identify trends and enhance security strategies.

Scalable and Flexible Deployment
Whether deployed in the cloud or on-premises, it supports global management, RESTful API integration, and system-wide data visualization for seamless integration within high-security or regulated networks.

Increased Efficiency and Reduced Costs
Manage hundreds of deployments from one platform, simplifying configuration, updates, status checks, health reporting, and license management to increase team efficiency and reduce operational costs.

Integration and Deployment

SaaS
For cloud deployments, our SaaS model ensures your organization has access to the latest updates and solutions, seamlessly integrated with your cloud infrastructure.

On-Premises
Designed for regulated, air-gapped, or high-security environments requiring full security and data control in offline operation.

RESTful APIs
My OPSWAT Central Management provides RESTful APIs for seamless and secure data transfers, enabling data visualization across various systems within your organization.
